Quarterly Review – September 30, 2018

FMI All Cap Equity

Performance	Quarter	YTD	1 Year	3 Years	5 Years	10 Years	Since Inception
All Cap (Gross)	2.86%	4.56%	10.57%	14.73%	11.98%	11.98%	10.30%
Russell 3000 Index	7.12%	10.57%	17.58%	17.07%	13.46%	12.01%	8.99%

Inception: December 31, 2007

Performance is preliminary and subject to reconciliation.

Investment Philosophy:

Purchase durable business franchises that are selling at a discount to their intrinsic value.

Investment Process:

We utilize a business owner's approach to investing, thoroughly investigating the economics of the business and the quality of the management team. Some of the characteristics of good businesses include strong recurring revenue and attractive returns-on-invested capital (ROIC). We have a strong orientation to low absolute or relative valuation, which are key to the execution of our investment strategy. A new idea will come from a variety of sources including company visits, screens, conferences, trade periodicals and general reading. All members of the research team are responsible for fundamental research.

Once an investment opportunity is identified it is put through an extensive due diligence process, which typically includes management interviews and site visits. When an acceptable level of conviction is achieved, the appropriate weighting (considering liquidity, valuation, etc.) is discussed and determined. A new company purchased in the portfolio will usually have an initial position size of 1-3%. The portfolio generally consists of 35-45 companies and is well diversified across sectors.

We are long-term investors, a typical holding period for our companies is three to five years, and portfolio turnover averages 20-40% per annum.

P/S Ratio	1.9x
P/B Ratio	3.8x
EV/EBITDA Ratio	11.4x
Number of Holdings	45
Active Share	92%

Recent Purchase:

Franklin Resources, Inc. Ticker: BEN Added: Sept. 2018

Franklin Resources is a leading global asset management firm best known for its Franklin, Templeton, and Mutual Series of funds and conservative value-based style of investing. Franklin Resources embodies the salient characteristics of a high quality, capital light, value focused, high active share investment management franchise. Today a confluence of factors has assembled to cast a shadow over the business and pushed the valuation of the stock down to a point where the shares already reflect the occurrence of a bear market. The company's enterprise value is \$9.6 billion, equating to a 1.5 times EV/revenue multiple and EBITDA under 4x. This compares to the company's 20-year average EV/revenue multiple of 3.6x, and EBITDA multiple of approximately 10x. In many regards the best medicine for today's challenges will come about with a turn in the market, setting the stage for valuations to be set by fundamentals -- and ultimately, a resurgence in the value of actively-managed portfolios. In this environment, Franklin's global investment franchise should regain its stature as one of the premier money managers. We initiated a 0.7% position in September 2018.

Recent Sale:

Progressive Corporation Ticker: PGR Sold: July 2018

Progressive is the third largest U.S. auto insurer, with approximately 10% market share. Since our initial Progressive purchase in 2014, the stock price has significantly outpaced the S&P 500. We don't have any short-term concerns about the company's business, but the stock's valuation is now approximately two standard deviations above the company's 20-year average. Longer-term, we harbor some concerns about the impact from autonomous vehicles reducing the insured U.S. fleet of vehicles, and the increase in competition as other auto insurers refund part of the 2017 corporate tax rate-driven savings to customers. We sold our 1.9% position in July 2018.

Returns reflect the reinvestment of dividends and other earnings.

The above table reflects past performance. Past performance does not guarantee future results. A client's investment return may be lower or higher than the performance shown above. Clients may suffer an investment loss.

Fiduciary Management, Incorporated (FMI) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. FMI has been independently verified for the periods 12/31/1993 - 12/31/2017. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The All Cap Equity composite has been examined for the periods 12/31/2007 - 12/31/2017. The verification and performance examination reports are available upon request. Benchmark returns are not covered by the report of independent verifiers.

FMI was founded in 1980 and is an independent investment counseling firm registered with the SEC and the State of Wisconsin. The firm manages over \$25.3 billion in assets of pension and profit sharing trusts, mutual funds, Taft-Hartley funds, insurance company portfolios, endowments and personal trusts. The firm includes both institutional and mutual fund business. Although the firm has participated in wrap programs, it is a separate and distinct business, and is excluded from firm-wide assets.

The FMI All Cap Equity Composite was created in December 2007. These accounts primarily invest in small, medium and large capitalization US equities.

The FMI All Cap Equity Composite reflects time-weighted and asset-weighted returns for all discretionary accounts. From December 31, 2007 all accounts were managed for at least one month. All returns are calculated using United States Dollars and are based on monthly valuations using trade date accounting. All accounts in this composite are fee paying. Gross of fees returns are calculated gross of management fees and custodial fees and net of transaction costs. Net of fees returns are calculated net of actual management fees and transaction costs and gross of custodial fees and withholding taxes. Dispersion is calculated using the equal weighted standard deviation of all accounts in the composite for the entire period. As of 12/31/2011, the trailing three year annualized ex-post standard deviation for the Composite and Benchmark are required to be stated per GIPS®.

Currently, the advisory fee structure for the FMI All Cap Equity Composite portfolios is as follows:

Up to \$25,000,000	0.75%
\$25,000,001-\$50,000,000	0.65%
\$50,000,001-\$100,000,000	0.60%
\$100,000,001 and above	0.55%

The firm generally requires a minimum of \$3 million in assets to establish a discretionary account. High Net Worth individuals may establish an account with a minimum of \$1,000,000, however, the firm reserves the right to charge a minimum dollar fee for High Net Worth individuals depending on the client servicing involved. The minimum account sizes do not apply to new accounts for which there is a corporate, family, or other substantial relationship to existing accounts. In addition, the firm reserves the right to waive the minimum account size and minimum annual fee under certain circumstances. A complete list and description of all firm composites is available upon request.

Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

The Russell 3000 Index® measures the performance of the largest 3,000 U.S. companies representing approximately 98% of the investable U.S. equity market. The All Cap Equity composite uses the Russell 3000 Index® as its primary index comparison.
